Available in SMA and Separate Account vehicles.

¹ Overall rating based on risk-adjusted returns out of 725 World Large Stock funds as of 9/30/20.

OBJECTIVE

The Fund seeks to achieve long-term capital appreciation.

INVESTMENT PHILOSOPHY

We believe:

- The market rewards companies over time for their free cash flow rather than their reported earnings.
- Investing in high quality companies that are generating cash and using it to create value for shareholders delivers superior risk-adjusted performance over time.
- A growing dividend produces an attractive source of income.
- The combination of fundamental and quantitative analysis may provide an information advantage, which is critical to exploiting the inefficiencies within the universe.

KEY FEATURES

- Utilize the combination of fundamental and quantitative analysis to invest in well-established companies, both in the U.S. and developed foreign markets, with the potential to grow their dividend streams over time.
- Seek cash-generative companies with stable earnings and operations that can deliver consistent returns on capital over a full market cycle.

PERFORMANCE OF A \$10,000 INVESTMENT

\$'s shown in thousands. The chart above represents historical performance of a hypothetical investment of \$10,000 in the Fund over the past 10 years (or for the life of the Fund if shorter). Performance calculations are as of the end of the quarter. **Past performance does not guarantee future results.** This chart does not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.

Returns shown for less than one year are cumulative. MRQ=Most Recent Quarter. Performance data quoted represents past performance and does not guarantee future results. Performance information for the institutional class shares prior to their inception is based on the performance of the retail class. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted. Performance data current to the most recent month-end may be obtained by visiting www.sbhffunds.com, or by calling (800) 392-2673.

From 5/1/20, until at least 4/30/21, the Adviser has contractually agreed to waive the investment advisory and/or administration fees and/or to reimburse other expenses (not including acquired fund fees and expenses, taxes, brokerage expenses, and extraordinary expenses), so that the ratio of expenses to average net assets as reported in the Fund's Financial Highlights will be no more than 0.89% and 0.74% for the Fund's Retail Class and Institutional Class, respectively, for such period. This agreement may not be terminated or modified by the Adviser prior to 4/30/21, without the approval of the Board of Trustees.

²Data as of 9/30/20. Model UMA assets of \$0 million are included in the AUA portion of the AUM/AUA total. ³Separately managed accounts are not distributed by Ultimus Fund Distributors, LLC.

Weighted Avg. Mkt Cap is the average of the market capitalizations of the companies in the portfolio weighted by the size of each company's position within the portfolio. **Median Market Cap** is the midpoint of market capitalization. **Price/Earnings** is a stock's per share price divided by its per share earnings over a 12-month period. **Active Share** is a measure of the percentage of stock holdings in a manager's portfolio that differs from the benchmark index. **Turnover** is the percentage of a portfolio that is sold in a particular year. **Beta** is a measure of a fund's sensitivity to market movements. **Standard Deviation** is a statistical measure of the historical volatility of a fund. **Tracking Error** is a measure of how closely a fund follows the index to which it is benchmarked. **Upside Capture** is the statistical measure of an investment manager's overall performance in up-markets. **Downside Capture** is a statistical measure of an investment manager's overall performance in down-markets. **Sharpe Ratio** is the average return earned in excess of the risk-free rate per unit of volatility or total risk.

The **MSCI World Index** is a broad global equity index that represents large and mid-cap equity performance across 23 developed markets countries. An investor cannot invest directly in an index.

RISKS: An investment in the Funds involves risk, including possible loss of principal. The principal risks of investing in Funds include currency risk, direct foreign exposure risk, indirect foreign exposure risk, and sector focus risk. The market value of a security or instrument may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally.

Foreign investment and Emerging Markets Risk: Foreign investments can be riskier than U.S. investments. Potential risks include adverse political and legal developments affecting issuers located and/or doing business in foreign countries, currency risk that may result from unfavorable exchange rates, liquidity risk if decreased demand for a security makes it difficult to sell at the desired price, and risks that stem from substantially lower trading volume on foreign markets. These risks are generally greater for investments in emerging markets, which are also subject to greater price volatility, and custodial and regulatory risks.

As of 9/30/20, WTMVX (Retail Class) in the World Large Stock category for the three-year period received 3 stars among 725 funds, for the five-year period received 3 stars among 608 funds and for the 10-year period received 3 stars among 360 funds. As of 9/30/20, WIMVX (Institutional Class) in the World Large Stock category for the three-year period received 3 stars among 725 funds, for the five-year period received 3 stars among 608 funds and for the 10-year period received 3 stars among 360 funds. The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Please consider the Fund's investment objectives, risks, charges and expenses carefully before investing.
