RISKS: An investment in the Funds involves risk, including possible loss of principal. The principal risks of investing in Funds include extension risk, indirect foreign exposure risk, market risk, portfolio management risk, and prepayment risk. The market value of a security or instrument may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally.

New Fund Risk: The Segall Bryant & Hamill Short Term Plus Fund was launched effective 12/14/18. There can be no assurance that the Fund will grow to or maintain an economically viable size. There may be limited or no performance history for investors to evaluate.

Fixed Income Risks: Fixed income funds are subject to additional risk in that they may invest in high-yield/high-risk bonds and may be subject to greater levels of liquidity risk. Additionally, investing in bonds entails interest rate risk and credit risk. In general, as prevailing interest rates rise, fixed income securities prices will fall.
